

# COMPANY PROFILE

# SARI MULTI UTAMA

INDONESIAN PACKAGING EXPERTS

“ With four decades of expertise,  
we are confident to offer you the  
**BEST SOLUTION**  
in packaging your valued brand ”

## INTRODUCTION

Sari Multi Utama is one of the pioneers in Indonesia’s PET manufacturing industry. Thanks to the ongoing cooperation and support from our prominent clients for four decades; we have become one of the largest PET manufacturing companies in the country.

As a leading PET manufacturer in Indonesia, we have a reputation for delivering products which are hygienic, reliable, and simply work. If you are looking for a partner to package your valued brand, then you have come to the right place. We are willing to work together in creating personalized packaging solutions that perfectly meet your needs.

Our message is clear: no one is turned away and a solution must be found for all packaging challenges.

We are ready to start earning your trust.

# ABOUT THE COMPANY

## MANY DECADES OF EXPERTISE AND COMMITMENT

The journey started in 1980 when we decided to be one of the pioneers in Indonesia's plastic industry by establishing our first factory in Bogor. Ten years after our establishment, we then decided to focus on the PET industry. Now, thanks to the long-term mutual relationship between the company, the employees and the client; and the implementation of cutting-edge technology, we have become a leading player in the PET industry.

Presently, we are operating factories in West and East Java, which implement ISO 9001-2015 quality management system. We have a combined annual production capacity of up to 600 million products; while our fleet of machines has exceeded 60 machineries. Those numbers will continue to grow along with the increasing needs of our clients.

## VISION

Our vision is to be one of the leading, most innovative and environmentally-friendly manufacturers in the PET Industry

## MISSION

Our mission is to always offer you the best solutions according to your needs. We do that by keep on expanding our product range, improving our processes without causing unnecessary harm to the environment, and maintaining long-term partnerships

# TIMELINE

1980

**Sari Multi Utama** started as a company, which was originally engaged in the field of plastic injection of electronic devices and automotive parts.

2000

Entered the **edible oil industry** by supplying **PET bottles** to one of the two largest **cooking oil** manufacturers in Indonesia.

2003

Formed a joint venture with **Takagi Seiko Corporation**, called **PT Takagi Sari Multi Utama**, which focuses on plastic **automotive** parts manufacturing.

Expanded out of Java Island.

Established a new factory in **Sentul**, which focuses on **PET bottle** manufacturing.

2010

As a form of environmental stewardship, PT Sari Multi Utama invented **18 g hot-fill preforms**, which were the lightest products on the market and became the **industry's standard** in no time.

2016

Installed the **50th machine** in **PT Sari Multi Utama's factory** in Sentul. The company continues to add more machines until now.

Entered the **HDPE closures** industry.

Started supplying products to the **beauty** and **pharmaceutical industry**.

Supplied **PET bottles** to the largest **bottled water** manufacturer in Indonesia.

1997

Supplied **PET bottles** to the largest **ready-to-drink tea** manufacturer in Indonesia.

2002

Established a new factory in **Surabaya**, which focuses on **PET bottle** manufacturing.

2004

Supplied **PET bottles** to one of the two largest **carbonated water** manufacturers in the world.

2005

Gained the **ISO 9001-2015** certification.

2015

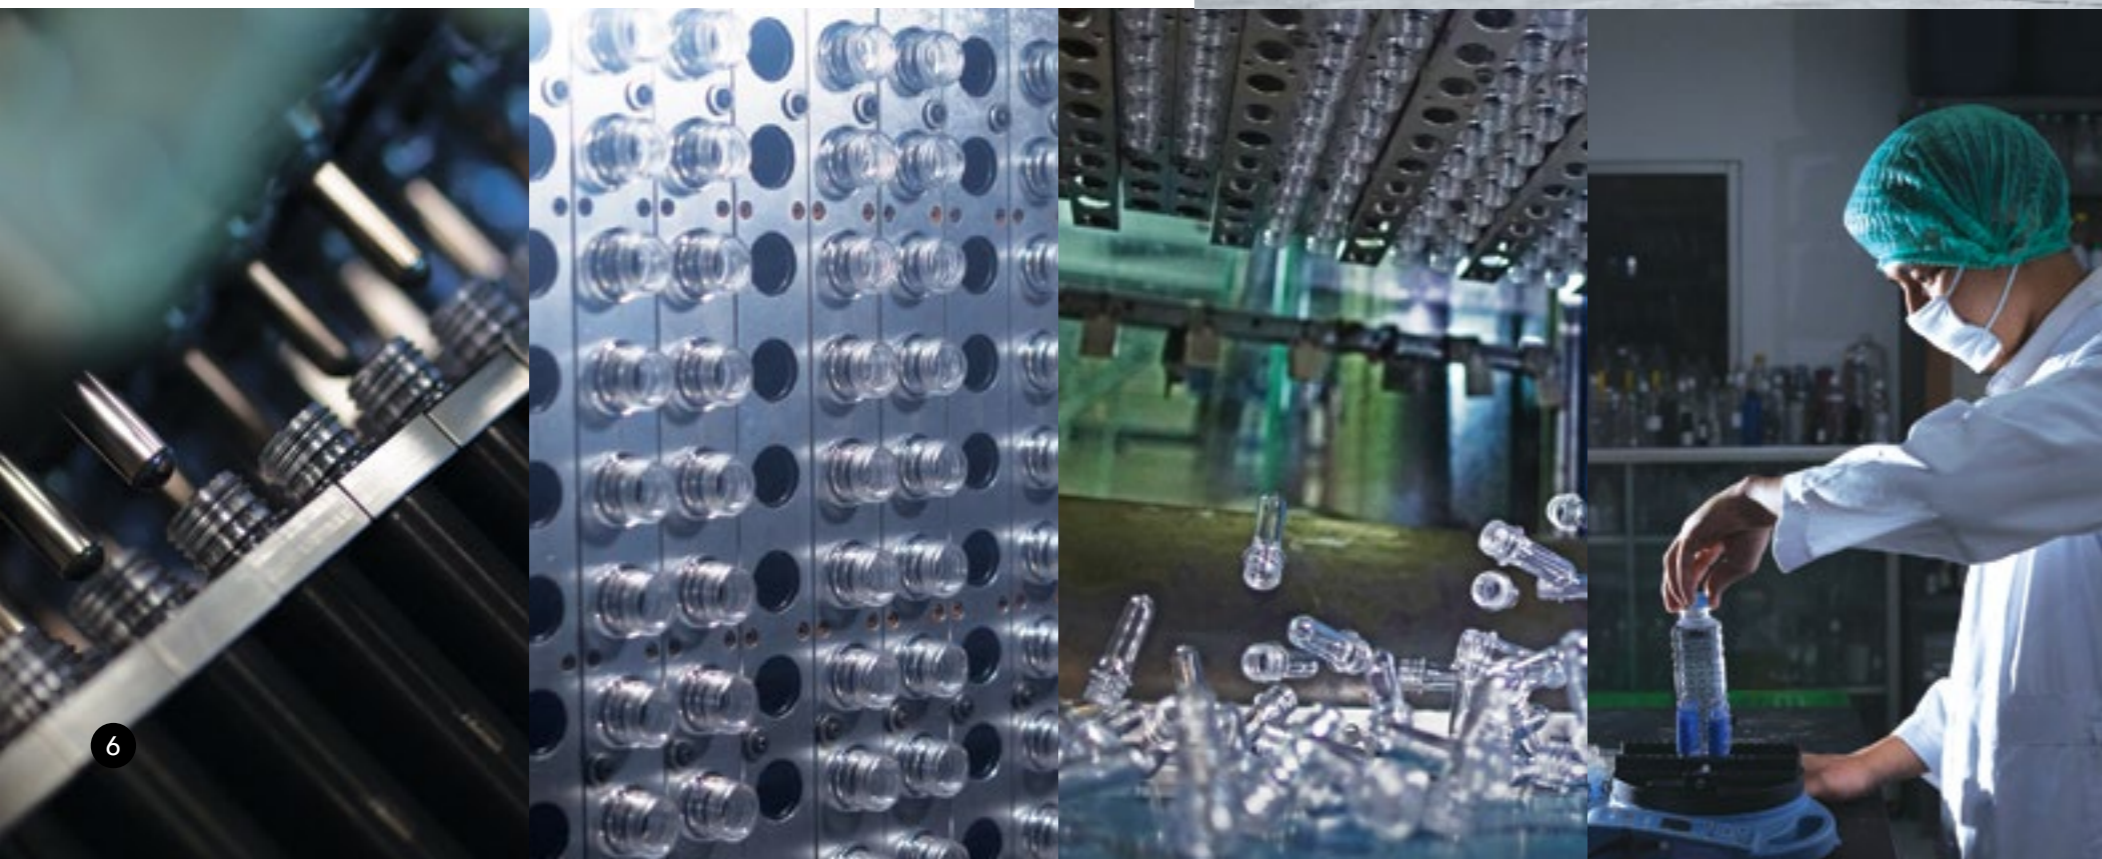

Established its first filling-plant in West Java and entered the beverage-filling industry.

2018

# OUR GROUP

Headquartered in Jakarta, we run the business operations of all the companies within our group, which are spread throughout Indonesia. These include:

- **PT DINAR MAKMUR**  
A company manufacturing Expanded Polypropylene Foam, Air Bubble Film, and Paper Pulp Molded Packaging.
- **PT DINAR MAKMUR CIKARANG**  
A company manufacturing Expanded Polystyrene Foam.
- **PT TAKAGI SARI MULTI UTAMA**  
A company specialized in the field of Plastic Injection.

# OUR PRODUCTS

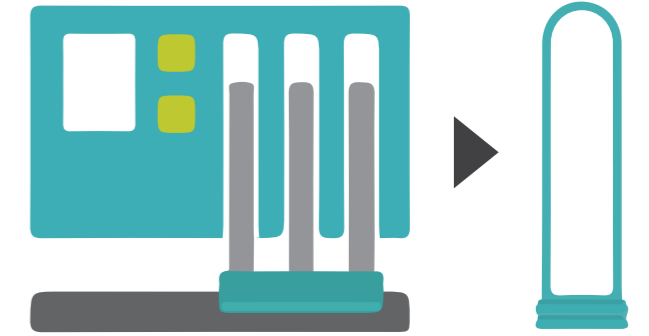

As one of the market leaders in Indonesia's PET industry, we guarantee that our clients will only receive the best products. We have a wide product range which includes preforms, bottles, jars, and closures.

# PREFORMS

We care about sustainable living; therefore we put in every effort to minimize our ecological footprint without compromising on product quality. In addition to utilizing only 100% recyclable plastic material, we also continually look for ways to reduce the use of raw plastic material in the injection process. One of our hot-fill PET preform products widely used by many leading beverage companies in Indonesia weighs only 18 grams, making it the lightest hot-fill PET preform currently available on the market.

# BOTTLES

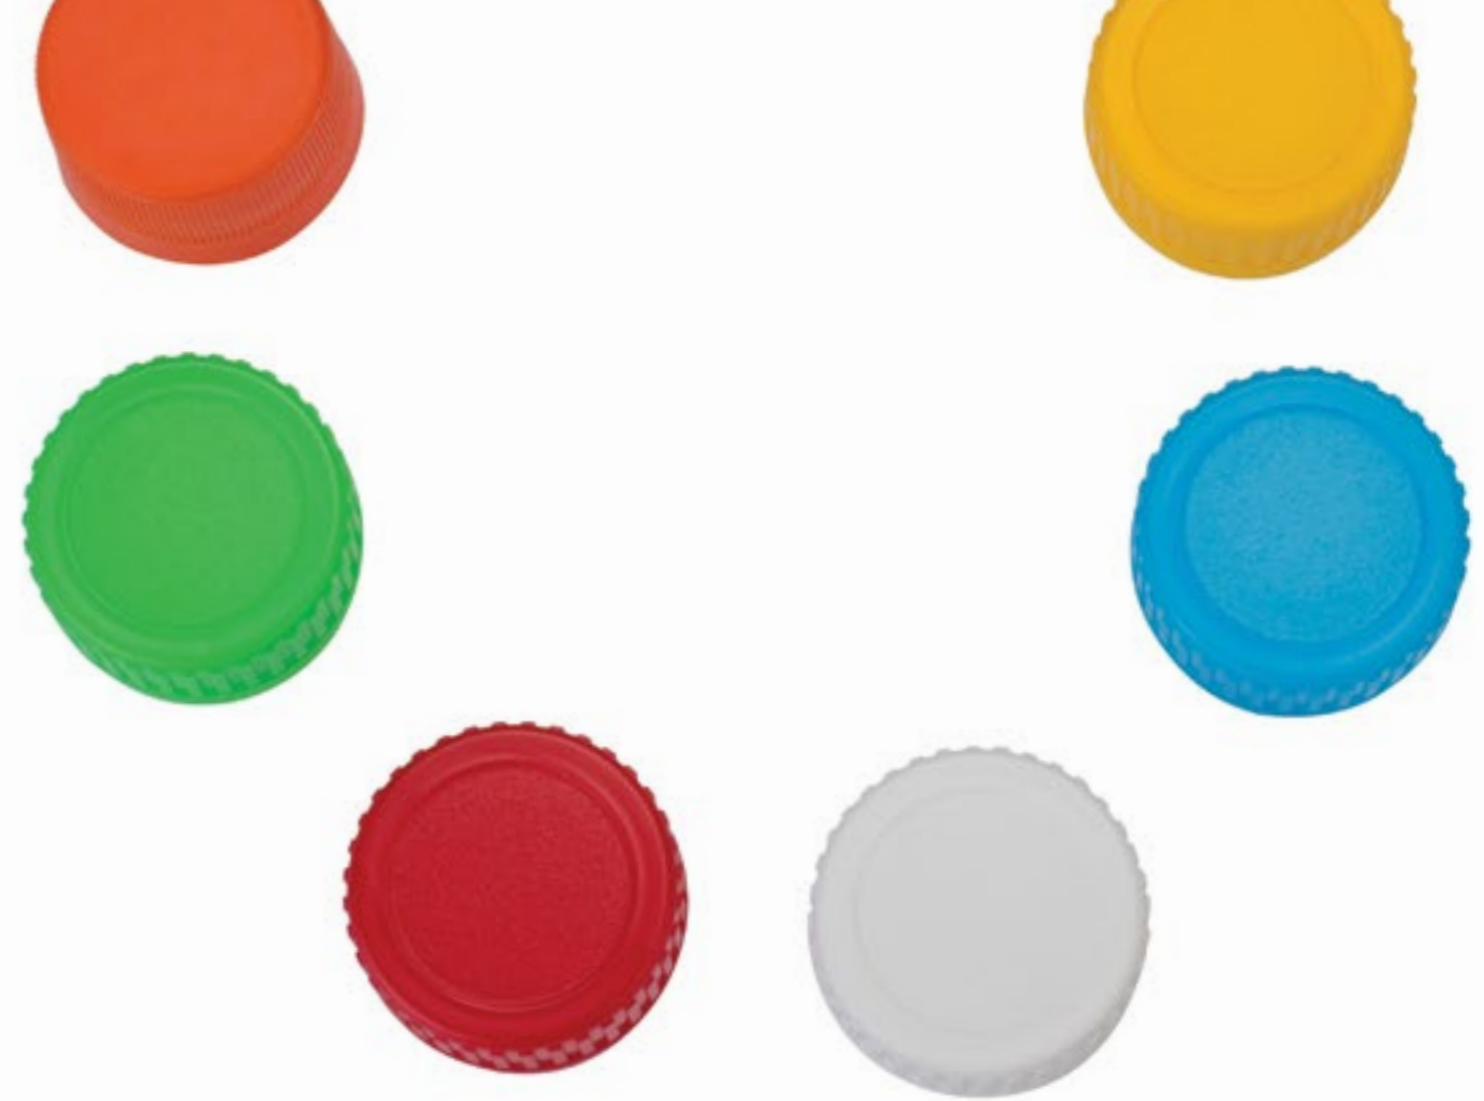

We produce PET bottles for hot-fill beverage, cold-fill beverage, edible oil, condiments, agricultural chemical products, beauty products and pharmaceutical products.

Occupying a total area of 27,000 square meters, our fleet of machines includes dozens of blow-molding machines for cold-fill containers with a combined production capacity of up to 380 million products and blow-molding machines for hot-fill and pasteurized containers with a combined production capacity of up to 160 million. Last but not least, we have 500 square meters of clean room facilities to serve your needs in sterile products.

# FOOD CONTAINERS

We also provide food containers, which are available in various sizes and shapes. In conformity with set industry standards, the products are precisely manufactured utilizing quality material and up-to-date techniques. Our offered products are highly appreciated for its features like light weight, scratch resistance and high durability.

# CLOSURES

We are aware that the slightest leakage on packaging containing liquid products may cause immeasurable loss in product quality and safety, not mentioning the collateral damage caused by such leakage to the manufacturing process and logistics. Our plastic cap compression molding machine is equipped with the latest technology, which ensures that every unit of plastic cap produced maintains proper consistency in terms of precision and strength.

# OUR PARTNERS

For nearly four decades, we are able to establish long-term trusted cooperation with numerous partners from various industries. We are highly inspired by our partners' success and proud to have contributed to their success. Allow us to also contribute to your success by packaging your valuable brands.

Our list of past and current premium-brand clients includes:
